Expand Case

The Expand Case is the ideal collaboration and learning tool for iPad. It's unique, patent pending design brings a wide angle view to your front facing camera with productivity enhancing stands.

For students: A great addition to any 1:1 iPad classroom. Bring student teamwork into Skype, Facetime or Hangout sessions. Use it with **Swivl Practice** app for develop reading, writing and drawing skills. Or use it with the **Recap** app, by Swivl to make video responses and reflections more effective and natural.

For teachers: Use it on its own or in combination with the Swivl Robot and the **Swivl Practice** app for capturing video in class for reflection and coaching. Great for expanding the field of view to capture student interactions.

For consumers: Transforms any video chat or conference into a group activity that instantly feels more natural. Works great with Skype, Facetime or Hangouts, to expand the conversation to more people and even include desktop items like documents and notebooks in the conversation.
