Swivl for Video Observations

Video Observations Put You at the Wheel

By choosing which of your lessons to record and share, you can take charge of your own professional development.

By making the most of Swivl's hardware and software tools to easily capture what's going on in your class, you can grow as a professional community by sharing it privately with peers and administrators. It's all in your hands: what you record, who you share with, how you develop and improve over time.

Record
The Swivl robot and app let you conveniently capture lessons on video with high quality audio.

Upload
The Swivl app uploads your videos. No flash drives needed! They stay private until you decide to share.

Get Feedback
Receive and respond to contextualized feedback on your video, right in the cloud.

A
AUTOMATE
Swivl takes just minutes to set up and there's no need to schedule time for observations.

B
BOND
Strengthen onsite professional networks by building trust and collaboration!

C
CONTROL
Videos are always private by default when uploaded. You choose when and what to share.
