

Achieve Pre-K C.L.A.S.S. Success with Swivl

If your Head Start program uses CLASS as its assessment tool, Swivl videos are equipped to provide evidence to satisfy each of CLASS's three major competency areas: **Emotional Support**, **Classroom Organization**, and **Instructional Support**. Because Swivl's unique tools capture everyday interactions between students and teachers, you will no longer miss moments that may meet CLASS criteria for assessment. Even more, Swivl's platform has customizable rubrics for feedback to simultaneously improve the quality of your feedback delivery systems while providing teachers with the genuine support they need to be successful.

How to use Swivl to assess C.L.A.S.S. competencies

Record all student and teacher interactions with up to five microphones to minimize distractions without excessive equipment

360° capture of classrooms with the ability to collect video from up to five auxiliary cameras for social emotional data collection

Bookmark using any microphone to elicit student responses and promote co-teaching collaboration

Customizable Rubrics for time-stamped commenting that allows for specific feedback tied back to the CLASS tool

Safety is our top priority

Swivl's platform is FERPA and COPPA compliant (US) and GDPR compliant (EU)

Video content is protected by AES-256 encryption

Swivl's platform offers several sharing and access restriction options set and managed by your organization
