

MIRRORTALK, M2 & REFLECTIVITY

Meet the new Swivl

Over a decade supporting educator development with the most innovative AI tools available in education.

MirrorTalk

An AI-powered reflection tool that helps deepen your students thinking and get insights on how they process material.

M2

An intelligent co-teacher that brings live feedback on teaching skills and puts your students on the leading edge of the use of AI.

Reflectivity

A video platform build for student collaboration and for providing structured feedback on student teaching capabilities.

With M2+MirrorTalk we're able to identify gaps and opportunities in teacher candidates' outcomes that were difficult to aggregate in the past. As their professor, it's helping me support them more holistically and improve my own practice as their mentor.

Amy Long | Assistant Professor, Lockhaven University
