

Create technology-enabled classrooms that work better for everyone

MirrorTalk and **M2** are AI-powered solutions designed to enhance classroom instruction and personalized learning with the help of real-time feedback and reflection.

Improve school conditions for student learning

Leverage classroom tools that create stronger, more responsive learning environments in real time:

- Gives teachers real-time feedback to improve instruction as it's happening
- Enable station-based learning and differentiated small groups without adding more to a teacher's plate
- Support multilingual learners with in-ear summaries and live translation prompts
- Use MirrorTalk to give students a voice and surface data for targeted support

Improve the use of technology to boost achievement

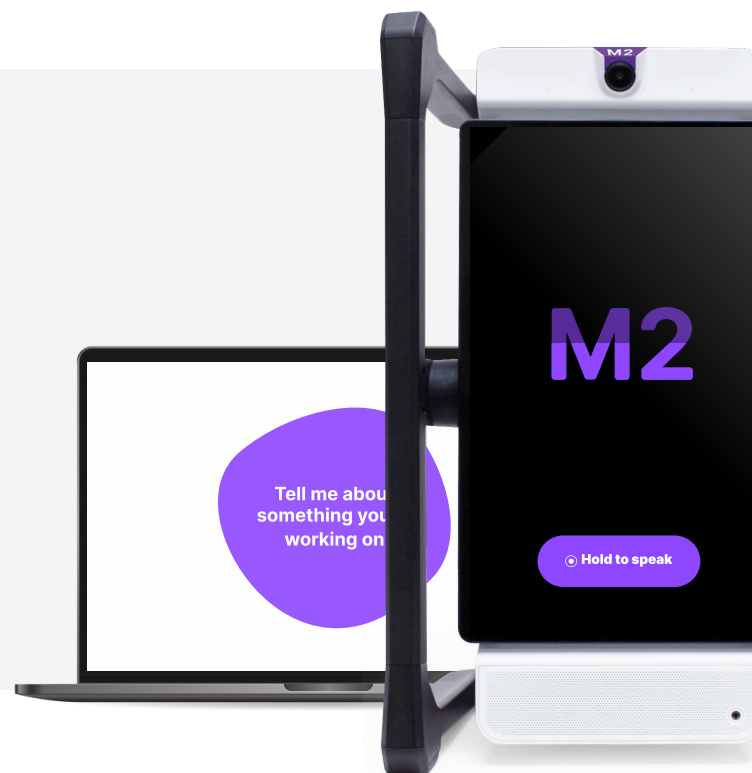

Empower educators to integrate technology in ways that directly improve student learning:

- M2 turns everyday instruction into a tech-enabled feedback loop that enhances teacher effectiveness and academic performance
- Teachers can use M2 to prompt students with AI-generated questions, summaries, and activities that build higher-order thinking skills and content mastery
- MirrorTalk enables voice-based reflection and formative assessment across any subject

Eligible for Title IV funds

M2 and MirrorTalk qualify for **Title IV, Part A** funding as tools that improve school conditions and help teachers use technology to raise student achievement and digital literacy.

Let's talk

Find out how you can use available funding to bring M2 and MirrorTalk into your classrooms.
