

## SWIVL ROBOT + M2 APP

For years, your Swivl Robot has captured video to support reflection and coaching needs. Now, paired with our new M2 app, it not only records audio and video, it also guides your teachers to create a more coherent school experience. **No new hardware required.**

# From Capture to Coherence

### Guide best practices

Immediate feedback and live guidance aligned to your curriculum, standards, frameworks.

### Provide needed support

A built-in chat partner for reflection with tools for planning, formative assessment and more.

### Make coherence visible

Capture evidence of practice, collaborate with coaches, and provide leaders with meaningful insight.

## Trialing M2 with your Swivl Robot is simple

Download Swivl M2 app and sign up for your 30 day trial. Connect your Robot in Swivl Capture, launch M2 from there, and start a teaching activity.
